

**Angels guard, escort and guide us.** They can convey secret wisdom and take us by the hand on our way up to higher spheres. The author explains the conceptions of angels in different religions and cultures. His ideas are based on the wealth of traditional spirituality and he invites his readers to reflect on what the different conceptions of angels really mean in life. How can we use these powers for our own benefit? What are miracles in their true sense? And where does our freedom remain if God intervenes in nature? Are heavenly delights or infernal tortures awaiting us in the life hereafter? And: what does this perspective mean for our here and now?

→The messengers from heaven in all cultures and religions and their meaning for us humans

Chaplain Dr. Franz Xaver Brandmayr, born in 1956, is a Catholic priest. He works as a chaplain at a parish in Vienna and as a judge at the court of the archdiocese in Vienna. He was involved in several beatification procedures as a director of the inquiry board or as the »advocatus diaboli«, the Devil's advocate. His last publication titles »Saints are human, too«.
