

»Far from accepting the established

Big Bang scenario – that everything began from nothing – I am inclined to believe that everything emerged and developed from a limitless field I call SpaceTime. In my view, all matter is condensed SpaceTime, and time is movement. What we call gravity is also the result of condensed SpaceTime.«

Johannes von Buttlar

→A fantastic journey through time to the key question of existence: what exactly is space, time and gravity? The answer is as groundbreaking as it is astonishing.
