

Native Americans and Australian Aborigines

have long understood the healing powers of body painting. This practical guide introduces us to their secrets. Discovered by the Viennese engineer and Life-Energy researcher Erich Körbler, they have been successfully incorporated into modern homeopathy. The key factor is the alignment of the characters: the sine curve, the Y, the cross and the circle. The healing properties are activated by eight basic symbols – the authors explain how these symbols work, and describe their possible applications, ranging from the treatment of allergies to toothache.
